

Product Information

Travabon® Classic

Fat-free skin protection against oily and water-insoluble workplace substances. Make it easier to clean your skin after contact with heavy-duty contamination.

DESCRIPTION

Travabon® Classic contain a high proportion of the inorganic solid talc, which forms a physical protective layer on the skin. This protective action has a particularly positive effect where skin comes into contact with organic solvents or substances containing solvents, as well as when working with metal-working oils and glass fibre.

Travabon® Classic contain special emulsifiers featuring very good skin compatibility. These emulsifiers act to reduce the ability of water-insoluble substances to cling to the skin, making it easier to clean skin that has been exposed to heavy-duty or very stubborn contamination. Used frequently, the protectant can substantially reduce the amount of strong hand cleansers often needed to remove stubborn ingrained dirt.

AREA OF APPLICATION

To protect the skin on hands and arms where there is contact with oily, water-insoluble substances and water-immiscible metal-working oils.

To make skin cleansing easier after working with heavy-duty or very stubborn, water-insoluble contamination caused by oil, paint, lacquer, graphite, metallic dust, adhesives and resins, and also after working with dry dust. Travabon® Classic is not designed for use under gloves.

Features	Benefits
contains special soil-suspending emulsifiers	<ul style="list-style-type: none"> • helps to stop stubborn types of dirt clinging to your skin • you can quickly and gently clean your skin • reduce the amount of skin cleanser required • no longer essential to use special skin cleansers
contains a very high proportion of inorganic solids (pigments)	<ul style="list-style-type: none"> • enhanced protective action when handling oily workplace substances • helps to stop dirt clinging to the skin (e.g. resins, lacquers), dermatologically tested
silicone-free and non-oily	<ul style="list-style-type: none"> • no adverse effects when coating surfaces
non-oily formulation, with natural film former	<ul style="list-style-type: none"> • greater safety when handling water-insoluble workplace substances
with glycerine and emollient	<ul style="list-style-type: none"> • active ingredients to support the skin's natural barrier
contains superior quality ingredients	<ul style="list-style-type: none"> • good skin compatibility • minimises the risk of dry skin

INSTRUCTIONS FOR USE

Wash and dry the skin thoroughly before each application. Then carefully rub Travabon® Classic on to the areas of skin at risk, including between the fingers and on the fingernails.

Travabon® Classic should always be used before starting work, after washing hands and after any lengthy breaks. To achieve the best results, the dirt should first of all be loosened using just a little water prior to actual cleaning, the skin should then be thoroughly rinsed under running water. Travabon® Classic must be applied again after heavy sweating or contact with water. NB: Using skin care products does not release you from your duty to take the prescribed protective measures.

PRODUCT DESCRIPTION

White-greyish, slightly perfumed, silicone-free, non-oily ointment with high pigment content (suspension).

Qualitative Composition*

AQUA (WATER), TALC, SODIUM COCOYL ISETHIONATE, GLYCERIN, SILICA, GLYCERYL STEARATE, LAURETH-10, BENTONITE, XANTHAN GUM, ALGIN, SODIUM PHOSPHATE, , LACTIC ACID, POTASSIUM SORBATE, DIETHYLHEXYL SODIUM SULFOSUCCINATE, SILVER CHLORIDE, PROPYLENE GLYCOL, TITANIUM DIOXIDE, PARFUM (FRAGRANCE).

The ingredient declarations used are in compliance with the International Nomenclature of Cosmetic Ingredients (INCI).

Efficacy Tests

In a test model developed by W. Gehring (Dermatological Clinic, Karlsruhe), it was demonstrated that a product of the type Travabon® Classic provided protection against the solvent toluene, the standard irritant used.

Fig1.

Fig2.

Illustration 1: cross sections of skin after being treated with toluene for 90 minutes: large blisters appear below the epidermis of the unprotected skin and result in the epidermis and dermis becoming detached (a). No skin damage can be seen to the skin protected by a product of the type Travabon® Classic; the condition of the skin is normal (b).

The greater ease of skin cleansing has been demonstrated in practical application tests specifically designed for this purpose (Research & Development, Deb-Stoko Europe, Krefeld), and in field studies as well.

Skin Compatibility Tests

Travabon® Classic is proven to have good skin compatibility properties in human-experimental tests and in practical use.

Medically certified skin compatibility expert reports prepared by Prof. Dr. med. S. W. Wassilew, MD for Dermatology, Allergology, Environmental Medicine, are available upon request.

Safety Data Sheet

Can be downloaded from www.debgroup.com/uk/msds

Storage Information

Travabon® Classic can be stored in an unopened container at room temperature for more than 30 months. Shelf life after opening: see indication on packaging.

First Aid

In the event of accidental eye contact with the product, rinse out using water (eye douche, eye irrigation bottle). Consult a doctor if any burning sensation persists.

Additional Information

Expert reports and certificates are available upon request.
